

JOHN PATRICK M. LINSON
Augustine St. Rodfer 2 Subd, Cainta Rizal 1900
jplinsonc24@gmail.com | +639563052862 | [Portfolio](#)

EDUCATION

Technological Institute of the Philippines

Quezon City
BS in Information Technology, Major in Cybersecurity 2019
- 2023

EXPERIENCE

Razza Consulting Group
Work From Home
Full Stack Developer & Cybersecurity | December 2024 – Present

Primary Job Responsibilities

Full Stack Development

- Design, develop, test, deploy, and maintain scalable web applications and services.
- Build responsive and user-centric front-end interfaces using modern frameworks (e.g., React, Angular, Vue).
- Develop and manage robust server-side logic using technologies such as Node.js, Python, PHP, or equivalent.
- Ensure high performance, responsiveness, and security of applications across devices.

Cybersecurity: Remediation and Incident Management

- Monitor applications and systems for potential security threats and vulnerabilities.
- Respond promptly to cybersecurity incidents; execute mitigation, remediation, and recovery procedures.
- Implement security measures such as firewalls, encryption, and secure coding practices.
- Conduct vulnerability assessments and provide recommendations to improve system security.

Infrastructure Management

- Oversee deployment, hosting, and configuration of cloud-based and/or on-premise environments.
- Manage system performance, uptime, and maintenance schedules.
- Ensure backup protocols, disaster recovery plans, and server security standards are implemented.
- Optimize resource utilization and scalability of infrastructure.

Secondary Job Responsibilities

Technical SEO

- Optimize website architecture, metadata, and page structure to enhance search engine performance.
- Implement structured data and schema markup in collaboration with content teams.
- Monitor and address crawl issues, indexation problems, and site performance using SEO tools.
- Provide technical recommendations to support organic search visibility and ranking improvements.

Cross-Functional & Documentation Support

- Collaborate with cross-functional teams including design, marketing, and operations.
- Maintain documentation of systems, processes, and code.
- Stay updated with emerging technologies, security protocols, and SEO practices.
- Perform other related tasks as assigned by management.
- Participate in structured upskilling and training activities for continuous professional development.

Decoplus

Cainta, Rizal

Web Developer | Aug 2023 – November 2024

- Customized and developed WordPress websites, focusing on user experience and responsiveness.
- Implemented and managed WooCommerce to enhance e-commerce functionality for various clients.
- Utilized Elementor to create visually appealing, dynamic web pages tailored to client specifications.
- Optimized websites using Yoast SEO, improving search engine rankings and online visibility.
- Managed and configured plugins to extend website capabilities while ensuring compatibility and security.
- Applied HTML, CSS, JavaScript, PHP, and MySQL for custom development and troubleshooting.
- Led website migrations, ensuring smooth transitions with minimal downtime.
- Integrated third-party APIs to add advanced features and improve site performance.
- Followed website security best practices to protect against vulnerabilities and maintain site integrity.

Superspeed Solutions & Services Inc.

Antipolo Rizal

Programming Intern | Mar 2023 – Jun 2023
